

MAXHUB LED Solution

Meeting Every Screen Need
Mastering Every Scenario

- All-in-one LED Display
- Indoor Fine Pixel Pitch LED Display
- Outdoor LED Display

One-stop collaboration solution

Easy to install and maintain

Immersive Teams experience

User-friendly experience

Multiple sizes and ratios

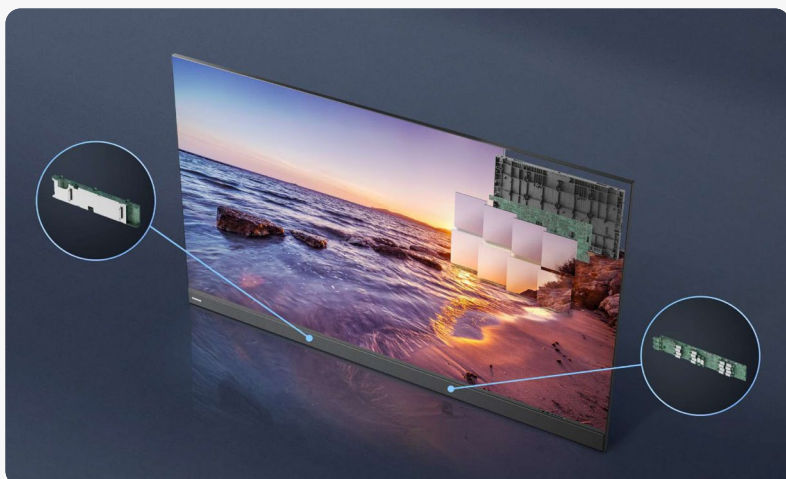

One smart display, numerous possibilities

Highly compatible with MAXHUB's extensive range of products such as Speakerphones, PTZ Cameras and the Smart Lectern, MAXHUB's Integrated LED Displays reduce the hassle of sourcing for supporting equipment, devices or applications. Own our LED solution and you'll own a network of tools that are both cost-effective and versatile enough to meet your every collaboration need.

A highly-integrated solution

MAXHUB's Integrated LED Displays are slim and lightweight, integrating a 3-in-1 design that combines the receiving card, power supply and HUB board. This user-friendly design maximizes performance and energy efficiency, while simplifying the maintenance process with front-facing maintenance support.

See the bigger picture with an ultra-wide view

Engage your audience with a 21:9 ultra-wide display, designed for visual impact and immersive viewing experiences. Our extended LED displays also integrate seamlessly with Microsoft Teams Rooms, allowing users to easily control and host meetings within the application.

Connect and share – in your own way

Utilizing technology unique to MAXHUB, our Integrated LED Displays are equipped with wireless capabilities that allow you to share content and control screens remotely – all through your personal devices.

The LAN screen-sharing feature also enables split screen-sharing for up to four windows, making it a huge plus for hosts and presenters.

Select and customize, regardless of your audience size

From closed-door conferences to outdoor showcases, MAXHUB's Integrated LED Displays are versatile enough to meet your every need. Our displays are available in a variety of dimensions, each easily assembled and installed through simple splicing technology.
